

**DIOGO AYRES-DE-CAMPOS**, MD, PhD is currently Associate Professor at the University of Lisbon and Chair of the Department of Obstetrics at the Santa Maria Hospital in Lisbon, Portugal. His main scientific areas of interest are intrapartum fetal monitoring and obstetric simulation. He is a co-inventor of the “Omniview-SisPorto®” program for computer analysis of fetal monitoring signals (Speculum, Lisbon, Portugal, 2006), the clinical record database Obscare (Virtualcare, Porto, Portugal), and was the medical consultant for the development of the “Lucina®” obstetric simulator (CAE Healthcare, Montreal, Canada, 2014). He was the principal investigator for the FM-Alert randomised controlled trial evaluating computer analysis of the CTG in 5 UK hospitals, for a total of 8100 enrolments. He has published 118 papers in international Medline-indexed journals, edited 4 books, authored 16 international book chapters, written 1 international book, and has given 137 invited lectures at international scientific meetings. He was Editor-in-chief of the “Acta Obstetrica e Ginecologica Portuguesa” in 2006-2010, Associate Editor of “ISRN Obstetrics and Gynecology” in 2012-2014, and since 2015 of “RBGO - Gynecology and Obstetrics”. He chaired the scientific committee of the 1st, 2nd and 3rd European Congress of Intrapartum Care (ECIC). He is the Secretary-General of the “Federation of Portuguese Societies of Obstetrics and Gynecology - FSPOG”, co-ordinates obstetric simulation for the “Portuguese College of Obstetrics and Gynecology”, is a Board member of the Subspeciality in Maternal-Fetal Medicine of the Portuguese General Medical Council and presides over the “National Commission for Reduction of Cesarean Section rates”, nominated by the Portuguese Ministry of Health, that led to a 10% decrease in overall national cesarean section rates between 2009 and 2014. Since 2016 he is Secretary-General of the “European Association of Perinatal Medicine - EAPM”. He is Council Member of the “European Board and College of Obstetrics and Gynecology - EBCOG”, and co-ordinator of EBCOG Part 2 Exam – Evaluation of clinical skill (Norwich 2016, Amsterdam 2017). Since 2010 he integrates the “Safe Motherhood and Newborn Health committee” at the “International Federation of Obstetrics and Gynecology - FIGO”, where he co-ordinated the 2015 revision of the “FIGO guidelines on intrapartum fetal monitoring”. He participated in the World Health Organisation consensus panels for “Recommendations on antenatal care” and “Intrapartum care and reduction of unnecessary caesarean section” in 2016.
